DETAILED ACTION

Notice of Informal Examiner's Amendment

"18" (page 26, line 26 and page 27, lines 17 & 18) has been changed to – 14 --.

Specification

1. The abstract of the disclosure is objected to because of legal phraseology (eg, "means" in lines 1,5,14 and 15). Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The preamble of claim 1 is not consistent with the body thereof. The preamble recites an apparatus for steering an automatic swimming pool cleaner, while the body of the claim further positively recites the pool cleaner. It is suggested that the preamble of claim 1 be changed to something like (1) "A swimming pool cleaning apparatus, comprising:" OR (2) "In combination with an automatic swimming pool cleaner having a housing, said housing having a front, a rear, an upper surface and a lower surface, an apparatus for steering the pool cleaner comprising:" (in this version lines 2-3 of claim 1 would need to be deleted). – In said. – should follow "disposed" (claim 6, line 1). Each of claims 9-13 are drawn to different embodiments for connecting the pole to the housing. As such, **claims 10-13 should each be amended to depend from claim 8.** "Material" (claim 9, line 2) should be – member --.
- Applicant should review the claims for any additional informalities.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Rief et al (USP 5,469,596). The patent to Rief discloses an automatic pool cleaner (20) in combination with a pole (27a) which may be removed from the cleaner during automatic pool cleaning operations and secured to an upper surface of the housing of the cleaning by a connecting means (27b). The subtle differences in the claim with regard to the use of the pole for steering fail to structurally define over the prior art. The pole (27a) does have a pair of opposed securing holes (claim 2). The reference to the pair of securing pins in claim 2 is noted; however, these elements are not positively claims until a subsequent claim.

Allowable Subject Matter

5. Claims 3-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Mathews is pertinent to pole for manipulating a

pool cleaner, the patent to Carbonell to detachable handle for an "automatic" cleaner and the remaining patents to detachable handles/poles for pool cleaning devices.
